

## Annex B - Proposed Classification and Description of the Revised 33 Categories of Controlled Goods

No.	Controlled Goods	Reclassification
1	Air cooler	No change
2	Adaptor	AC Adaptors
3	Audio product	Audio and video products
4	Cooking range	Stationary cooking appliances
5	Coffee maker, slow cooker, steam boat and similar appliances	No change
6	Decorative lighting fixture	No change
7	Hair dryer	Hair care appliances
8	Home computer system (inclusive of monitor, printer, speaker and other mains operated accessories)	No change
9	High-fidelity set	Audio and video products
10	Iron	No change
11	Immersion water heater	Removed and regulated under CGSR
12	Kettle	Liquid heating appliances
13	Laser disc set	Audio and video products
14	Microwave oven	No change
15	Mobile split air-conditioner	Removed and regulated under CGSR
16	Mixer, blender, mincer and similar appliances	Kitchen machines
17	Refrigerator	No change
18	Rice cooker	No change
19	Room air conditioner	No change
20	Television / video display unit	Audio and video products
21	Table / standing fan	Fans
22	Table / standing lamp	No change
23	Toaster, grill, roaster, hot plate, deep fryer, wok and similar appliances	No change
24	Video cassette recorder	Removed and regulated under CGSR
25	Vacuum cleaner	No change
26	Washing machine	No change
27	Wall fan / ceiling fan	Fans
28	Components of the LPG gas system <ul style="list-style-type: none"> <li>• hose</li> <li>• regulator</li> <li>• valve</li> </ul>	<ul style="list-style-type: none"> <li>• No change</li> <li>• No change</li> <li>• No change</li> </ul>

No.	Controlled Goods	Reclassification
29	Gas cooker	Gas cooking appliances
30	Gas canister	No change
31	Portable cooking gas appliance	Gas cooking appliances
32	3-pin rectangular type 13-amp plug	3-pin mains plugs
33	Fuse ( $\leq 13$ amperes) for use in plug	No change
34	3-pin round type 15-amp plug	3-pin mains plugs
35	Multi-way adaptor	No change
36	3-pin portable socket-outlet	Portable socket-outlets
37	Portable cable reel	Portable socket-outlets
38	Instantaneous electric water heater	Water heaters
39	Mains pressure electric storage water heater	Water heaters
40	Residual Current Circuit Breaker (RCCB)	No change
41	3-pin 13-amp socket-outlet	Mains socket-outlets
42	3-pin round type 15-amp socket-outlet	Mains socket-outlets
43	Domestic electric wall switch	No change
44	Ballast for tubular fluorescent lamp	Lamp control gear
45	Isolating transformer for downlight fitting	No change

No.	Existing Controlled Goods	Reclassification	Description
<b>Low Risk</b>			
1	Air cooler	Air cooler	Air cooler, which is an electrical appliance intended for household use to agitate the air and equipped to use water as a cooling medium, with rated voltage of not more than 250 Vac.
2	Fuse (13-amp or less) for use in a plug	Fuse (13-amp or less) for use in a plug	Fuse (13-amp or less) for use in a 13-amp plug, which is a device that, by the fusion of one or more of its specially designed and proportioned components, opens the circuit in which it is inserted and breaks the current when this exceeds a given value for a sufficient time.
3	Home computer system (inclusive of monitor, printer, speaker and other mains operated accessories)	Home computer system (inclusive of monitor, printer, speaker and other mains operated accessories)	Home computer system (inclusive of monitor, printer, speaker and other mains operated accessories), which is a microcomputer and its associated accessories, intended for household use, with rated voltage of not more than 250 Vac.
4	Room air conditioner	Room air conditioner	Room air-conditioner, which is an electrical appliance intended for household use and designed as a self-contained unit for mounting on a window or through a wall to provide conditioned air to an enclosed area, with rated voltage of not more than 250 Vac.
5	Table / standing lamp	Table / standing lamp	Table or standing lamp, which is an electrical portable general purpose luminary intended for household use with supply voltage of not more than 250 Vac.
<b>Medium Risk</b>			
6	Adaptor	AC adaptors	AC adaptors, which are external electrical power supplies intended for household use to power or charge electrical household appliances or devices, with rated voltage of not more than 250 Vac.
7	Audio product	Audio and video products	Audio and video products, which are electronic devices for home entertainment designed to be fed from the supply mains and intended for reception, generation, recording or reproduction, respectively of audio, video and associated signals, with rated voltage of not more than 250 Vac.
	High-fidelity set		
	Laser disc set		
	Television or video display unit		
8	Coffee maker, slow cooker, steam boat and similar appliances	Coffee maker, slow cooker, steam boat and similar appliances	Coffee makers, slow cookers, steam boats and similar appliances, which are electrical appliances intended for household use to heat liquids for the purpose of food or beverage preparation, with rated voltage of not more than 250 Vac.
9	Decorative lighting chain	Decorative lighting chain	Decorative lighting chain, which is an electrical lighting chain intended for household use and fitted with a series or parallel or combination of series or parallel connected light emitting devices, with rated voltage not exceeding 250 Vac.
10	Table or standing fan	Fans	Fans, limited to ceiling, table, standing and wall fans, which are electrical appliances for circulating the air in its vicinity and intended for household use, with rated voltage of not more than 250 Vac.
	Wall or ceiling fan		

No.	Existing Controlled Goods	Reclassification	Description
11	Gas canister	Gas canister	Gas canister, which is a non-refillable metallic container up to 1.4 litres capacity filled with liquefied petroleum gas intended for household use with a portable gas cooker.
12	Hairdryer	Hair care appliances	Hair care appliances, limited to hair dryers, hair curlers, hair straighteners and hair stylers, which are electrical hand-held appliances intended for household use to dry or care for human hair, with rated voltage of not more than 250 Vac.
13	Iron	Iron	Iron, which is an electrical hand-held appliance intended for household use, with a heated soleplate for smoothing or pressing fabric, including those with a separate water reservoir or boiler having a capacity not exceeding 5 litres, with rated voltage of not more than 250 Vac.
14	Isolating transformer for downlight fitting	Isolating transformer for downlight fitting	Isolating transformer for downlight fitting, which is an isolating transformer intended for household electrical installation with input and output windings that are electrically separated to limit hazards due to accidental simultaneous contact with earth and live parts or metal parts that may become live in the event of an insulation failure.
15	Mixer, blender, mincer and similar appliances	Kitchen machines	Kitchen machines, including mixers, blenders and mincers, which are electrical appliances intended for household use to prepare food or beverages, with rated voltage of not more than 250 Vac.
16	Kettle	Liquid heating appliances	Liquid heating appliances, limited to kettles, airpots and hot water dispensers, which are electrical appliances intended for household use to heat liquids for consumption that have a rated capacity not exceeding 10 litres and with rated voltage of not more than 250 Vac.
17	Microwave oven	Microwave oven	Microwave oven, which is an electrical appliance intended for household use that uses high-frequency electromagnetic waves for heating food or beverages, with rated voltage of not more than 250 Vac.
18	Multi-way adaptor	Multi-way adaptor	Multi-way adaptor, which is intended for household use, has more than one set of socket contacts, and which may or may not be of the same type or rating as the plug pin portion.
19	Toasters, grills, roasters, hot plates, deep fryers and similar appliances	Toasters, grills, roasters, hot plates, deep fryers and similar appliances	Toasters, grills, roasters, hot plates, deep fryers and similar appliances, which are electrical appliances intended for household use that use heated medium such as air and cooking oil for food preparation, with rated voltage of not more than 250 Vac.
20	3-pin portable socket-outlet Portable cable reel	Portable socket-outlets	3-pin portable socket-outlets, including portable cable reels, which are electrical accessories intended for household use that have at least a set of 13-amp shuttered socket-outlets with flexible cords, and which can be easily moved from one place to another while connected to rated voltage supply of not more than 250 Vac.
21	Residual Current Circuit Breaker (RCCB)	Residual Current Circuit Breaker (RCCB)	Residual current circuit breaker (RCCB), which is an electrical device intended for household fixed-electrical installation with sensitivity of 30 mA intended to protect

No.	Existing Controlled Goods	Reclassification	Description
			persons against indirect contact, the exposed conductive parts of the installation being connected to an appropriate earth electrode.
22	Rice cooker	Rice cooker	Rice cooker, which is an electrical appliance intended for household use to cook rice, with rated voltage of not more than 250 Vac.
23	Cooking range	Stationary cooking appliances	Stationary cooking appliances, limited to cooking ranges, hobs and ovens, which are electrical stationary appliances intended for household use for cooking, with rated voltage of not more than 250 Vac for single-phase and 480 Vac for three-phase.
24	Vacuum cleaner	Vacuum cleaner	Vacuum cleaner, which is an electrical portable appliance intended for household use to remove dirt or dust, with supply voltage of not more than 250 Vac.
25	Washing machine	Washing machine	Washing machine, which is an electrical appliance intended for household use to wash clothes and textiles, with rated voltage of not more than 250 Vac.
26	3-pin rectangular type 13-amp plug	3-pin mains plugs	3-pin mains plugs, limited to 13-amp rectangular types and 15-amp round types, which are portable devices that have rectangular or cylindrical projecting pins designed to engage with the contacts of a corresponding socket-outlet. 3-pin mains plugs also incorporate means for the electrical connection and the mechanical retention of a suitable flexible cord.
	3-pin round type 15-amp plug		
<b>High Risk</b>			
27	Components of the LPG system	Components of the LPG system	
	<ul style="list-style-type: none"> <li>Hose</li> </ul>	<ul style="list-style-type: none"> <li>Hose</li> </ul>	Hose, namely a hose intended for household use in liquefied petroleum gas vapour phase and liquefied petroleum gas or air appliances not exceeding 5 KPa (50 mbar) operating pressure.
	<ul style="list-style-type: none"> <li>Regulator</li> </ul>	<ul style="list-style-type: none"> <li>Regulator</li> </ul>	Regulator, which is a non-adjustable device intended for household use that maintains the outlet pressure constant at a nominal value up to and including 50 mbar, independent, within specified limits, of inlet pressure or flow rate.
	<ul style="list-style-type: none"> <li>Valve</li> </ul>	<ul style="list-style-type: none"> <li>Valve</li> </ul>	Valve, which is a device that is made from brass, bronze or aluminium forging, intended for household use with liquefied petroleum gas cylinders, to control the direction and volume of flow of the liquefied petroleum gas.
28	Domestic electric wall switch	Domestic electric wall switch	Domestic electric wall switch, which is an electrical manually operated general purpose switch for alternating current only, with a rated voltage not exceeding 440 V and a rated current not exceeding 63 A, intended for household fixed-electrical installations.

No.	Existing Controlled Goods	Reclassification	Description
29	Gas cooker	Gas cooking appliances	Gas cooking appliances, limited to built-in, table, free standing and portable gas cookers, which are cooking appliances intended for household use that use gas or liquefied petroleum gas obtained from a non refillable gas canister up to 1.4 litres as fuel.
	Portable cooking gas appliances		
30	Ballast for fluorescent lamp	Lamp control gears	Lamp control gear, which is an electrical device intended for household electrical installation that limits the current of the lamp or supplies constant current or constant voltage to power LED lighting.
31	3-pin 13-amp socket-outlet	Mains socket-outlets	Mains socket-outlets, which are electrical devices that have a 13-amp or 15-amp switched shuttered socket-outlets in a single or multiple arrangements, to engage with the pins of a corresponding plug designed for flush mounting in a suitable box or for surface or panel mounting.
	3-pin round type 15-amp socket-outlet		
32	Refrigerator	Refrigerator	Refrigerator, which is an electrical appliance intended for household use that operates on the vapour compression principle for food storage and preservation, with rated voltage of not more than 250 Vac.
33	Instantaneous electric water heater	Water heaters	Water heaters, limited to instantaneous and storage types, which are electrical appliances intended for household use to heat water below boiling temperature, with rated voltage of not more than 250 Vac.
	Mains pressure electric storage water heater
